

V – Series Pumps

The V series super silent pumps are constructed using high quality aluminium alloy for outer casing.

Its design adopts a double damping noise absorbing system.

Highly efficient, energy saving and low in noise. Double air chamber structure ensures continuous flow of air. Casing is of waterproof design and is effective in heat dissipation.

Suitable for various applications including aeration, medical equipment and industry uses.

Model V-10

Power:10W

Voltage: 230v

Pressure: >0.02Mpa

Output:10 l/min

Noise: <35dB

Weight: 1.3 kg

Size: 129x122x101mm

Model V-20

Power:15W

Voltage: 230v

Pressure: >0.02Mpa

Output:20 l/min

Noise: <40dB

Weight: 2.5 kg

Size: 230x185x180mm
