

DrainPlus

Advanced dosing system

Seko industry leading manufacturer of timed dosing systems introduce the new Drain Plus Electronics and experience upon reliability and ease of use

DrainPlus

Perfect control

Based on the normative EN 1825 all places like butchers, slaughterhouses, restaurants, fast foods, industrial chicken and canteens in general are provided of grease trap.

Drain Plus is the timed system who find is main application on the enzyme dosing in order to prevent clogging and reduce at the minimum the maintenance.

It can be used also in application: odour control, drain, to prevent the clogging, water lift station, in general in all installation where is request a daily injection.

What are the benefits?

Part number **SDRPL7PM3000**

Reliable

Thanks to the new electronics, Drain Plus check in each moment the motor status, it integrates in case of more Power requests and shoot down the energy in case of motor being stuck (ex injection point clogged) this in order to avoid braking and have a dosage much more precise than before.

Durable

Peristaltic pump with Sekoflex and transaxale technology guarantee a perfect combination in term of chemical compatibility with the most common products and an excellent mechanical resistance.

Easy

Intuitive menu, there are two separate menu, program and setting, with the easier is possible make the system working with few operations.

Accurate

Drain Plus can be calibrated, the calibration allow the system doing a perfect dosage because it take care about all factors like a back pressure which compromise the standard flow rate so the dosage.

Adaptable

Stock is reduced, thanks to the adaptable features:

- Power Supply Universal (100- 240Vac)
- Adjustable flow rate (120ml/h to 12lt/h) (0.07oz/min to 7oz/min)
- Relay to control external pump or SV (10A – 250Vac)
- Multilingual menu
- Measure unit in litre or once
- Installation kit ready for the the most common installations
