

Kronos

Peristaltic dosing pump

The **Kronos**

PERISTALTIC METERING PUMP DRIVE BY A STEPPER MOTOR

The feed chemical is conveyed by means of the rotor squeezing on the hose. No valves are needed for this. This ensures gentle handling of the metered media.

The housing is made from shock-proof and chemical resistant PPE with IP65 protection degree. It is equipped with several inputs for metering configuration.

The stepper motor means that metering is infinitely adjustable.

Typical applications are in processes where only a low discharge pressure is required, such as in the metering of chemicals into galvanic baths, in clarification tanks or for metering conditioning agents into swimming pools (flocculants, activated carbon and chemicals).

Features

■ DOSING

- By stepper motor technology
- Safely **up to 10 l/h** and **up to 3 bar**
- Suitable firmware micro dosing
- Minimum dosing note 2 ml/h continuous

■ MOTORS

- Accurate, reliable and ultra quiet <35 db
- Direct coupling

■ TUBING

The perfect choice to dose degassing liquid without the needs of "special" accessories

■ MODE

● FULL MODE

kronos FM pump has multi-function setting there are six (6) different configuration, as following:

- Manual Mode (Constant dosing)
- mA Mode (Proportional dosing)
- PPM Mode (Concentration dosing)
- 1:N Mode (Speed up dosing)
- N:1 Mode (Speed down dosing)
- Batch Mode (Setting dosing)

● CONDUCTIVITY MODE

kronos CR pump has a conductivity measure integrated. The dosing pump has two (2) different configuration, as following:

- Manual Mode (Constant dosing)
- Conductivity Mode (SetPoint Dosing)

Products Line

Model	Nominal Pressure	Delivery Rate	Minimum Delivery Rate	Tubing	Tubing internal diameter
kronos50 FM10	2 bar	10 l/h	10 ml/h	seko Med	6 mm
kronos50 FM02	3 bar	2 l/h	2 ml/h	seko Extra	3 mm
kronos50 CR10	2 bar	10 l/h	10 ml/h	seko Med	6 mm

Design and Functional description

The device is housed in a robust plastic housing.

The plastic housing is comprised of upper and lower sections, which are screwed together. The lower section contains the PCBs for power supply and connectors.

This construction technology simplify the installation: block part will easily fixed at the wall and all wire are connected on that part.

Once wiring is completed the front part can do screwed on the block one.

The liquid end is mounted at the front and is closed off by means of a screwed transparent cover to protect against injuries. The pump hose can easily be exchanged after the transparent cover has been removed.

The rotary movement of the rotors alternately press and relax pump hose by three rollers. As a result, the liquid is sucked in and transported through the pressure hose without stress. The pump si self priming in all conditions.

Dimensions

Code	Model	Description
KRFM0210	kronos50 FM10	kronos 10 l/h @2 bar full mode
KRFM0302	kronos50 FM02	kronos 2 l/h @3 bar full mode
KRCR0210	kronos50 CR10	kronos 10 l/h @2 bar conductivity mode

A Worldwide Group at your service

seko has been a significant manufacturer of metering pumps and dosing systems for over 40 years. This long activity allowed seko to acquire a vast experience in diversified applications and to confirm its international success in many industrial fields through the supply of reliable solutions for the dosing, injection and transfer of liquids

Today **seko** is an International Group, developing, manufacturing and delivering its products in more than 50 countries, through its 16 subsidiaries and an extended network of distributors, agents and authorized dealers
