Mini-Bulk Chemical Transfer Systems & Accessories
Shurflo Mini-Bulk Chemical Transfer Pumps and Systems are purpose-designed and built for Ag market professionals. Drawing on a long history of pioneering leadership in the design and manufacture of 12-volt agriculture spray pumps, and input from Ag professionals, Shurflo Mini-Bulk systems include many innovations that provide substantial user benefits.

**SF-1100 PUMP FEATURES:**

- Highly efficient design delivers increased flow with viscous micro encapsulated or suspended chemicals.

- High flow rate while pumping viscous chemicals, in combination with free flowing return loop, provides substantially increased turnover rate on recirculation models.

- Shurflo proprietary designed co-molded diaphragm molecularly bonds the pump piston to the diaphragm in the molding process. The result is an inherently leak proof diaphragm capable of years of trouble-free service.

- The highly efficient design utilizes a Shurflo-built 3” diameter permanent magnet motor — More performance and less weight, without more cost.

- While designed and tested to provide high performance and years of durability, the SF-1100 is field serviceable with hand tools.

**FM-1100 METER FEATURES:**

- Highly accurate nutating disk design.

- Large LCD display makes meter reading easy from a distance on pump mounted systems.

- Simple calibration steps and control button layout.

- Long-life lithium batteries.

- Easy-to-service electronics and batteries.

- Available in both pump-mounted and hose-end configurations.
